DETAILED ACTION

Allowable Subject Matter

1. Claims 1-52 are allowed.
2. The following is an examiner's statement of reasons for allowance:

The present application provides a new system and method for printing time-based media based on content therein, wherein the printing system can perform content-based functionalities on time-based media and then prints the results of these operations in a useful and intelligent format (specification, paragraph [0023]).

Particularly, the new system and method comprise the following features, which the prior art taken either singly or in combination does not teach:

- a content recognition module that segments the media data according to a content recognition algorithm; and output system that produces a printed output based on the segmented media data, the printed output including a plurality of samples of the media data that correspond to the segmented media data (see independent claim 1);

- a printer configured to segment the media item according to a content recognition algorithm and produce a printed output based on the segmented media item, the printed output including a plurality of samples of the media item and information related to the samples (see independent claim 29);

- a step for segmenting the media data based on media content, the step for segmenting performed at least in part by a printing system; and producing a
